

MONSOON

WET DOWNDRAFT TABLE

The MONSOON™ Wet Downdraft Table product series delivers the safe capture of hazardous/combustible dusts with the smallest equipment footprint in the industry. This self-contained wet downdraft table's patent-pending design achieves a very high face-velocity at a very affordable price. A wide range of application kits and custom fittings can help you meet your NFPA and OSHA requirements.

The MONSOON™ series all include industrial swivel casters, adding mobility and versatility to your application. This wet filtration table is perfect for capturing combustible dust, including mixtures of steel, aluminum, titanium, and magnesium.

The MONSOON™ works by drawing dust-laden air through the table surface and into a cascading water bath. The wet downdraft table cleans the air by using the combined action of centrifugal force and a thorough intermixing of water and dust laden air. The dust is separated from the airstream by water droplets created by the flow of air through strategically placed baffle plates. Once wet, the dust becomes permanently trapped and falls down into a reservoir.

Benefits:

- Capture-at-source for Cleaner Air
- Complies with NFPA guidelines for Combustible Dust

Features:

- Auto-fill Water Control System (3X4, 3X6, 3X8)
- Anti-corrosion Stainless Steel Construction
- Motor Starter and a Non-Sparking Blower Wheel
- Low-cost mist eliminator afterfilters

Options:

- Auto Wash-down System
- WV-55 Sludge-Vac
- Side and Back Walls
- Hepa after-filter kit (99.99% @ 0.3 micron)
- Dust-Tight/Vapor-Tight Light Kit
- Auto-fill Water Control System (MDD-MINI)

**Custom configurations available on request.*
